INTROTEK® INTERNATIONAL LP LAUNCHES its latest Non-Invasive Continuous Liquid Level Detector

Edgewood, New York — **INTROTEK INTERNATIONAL**, a global leader in the ultrasonic technology arena has announced the launch of their latest Non-Invasive CONTINUOUS LIQUID LEVEL DETECTOR ("CLM"). The CLM delivers the answer for challenging non-invasive liquid level monitoring for a variety of fixed tanks and vessels comprised of, Stainless Steel, Copper, Aluminum, Teflon, Plastic and Fiberglass. The CLM is designed to operate under a wide range of supply voltages and will effectively accommodate many different industries & applications. Additional features include a bi-color LED visual indicator, assuring optimum transducer placement, standard dip switch capability providing field adjustment for 8 various discreet tank levels. The CLM is designed for easy install and withstands the rigorous and demanding usage often found in the Pharmaceutical, Laboratory, Chemical, Waste Management, and Food & Beverage industries. More complete specifications, dimensions and wiring information for the CLM and other Introtek products are available at Introtek.com.

Continuous Liquid Level Detector (CLM)

INTROTEK INTERNATIONAL has been custom designing and manufacturing non-invasive ultrasonic sensors since 1982, and is a wholly owned subsidiary of Magnetrol since 1986. **INTROTEK** also provides sensors for air bubble detection in tubing, liquid level detectors for vessels, tanks and containers, blood component detection and a variety of sensors for drip chambers and syringes.
