

# INTROTEK<sup>®</sup>

Excellence in Ultrasonic Technology<sup>SM</sup>

As a consumer of materials and products, Introtek International is affected by the statutory requirements as a "downstream user" as defined in the REACH regulation (EC 1907/2006). As a downstream user, we have informed our upstream suppliers about the existing preregistration or registration requirement for affected manufacturers and importers of chemical substances and have requested them to urge their upstream suppliers to comply with the requirements from the REACH regulation as well.

So far, we have not received any information that an ingredient of our products subject to mandatory registration has not been pre-registered or is used. At present, we can therefore assume that the ingredients currently in use are still available.

The products manufactured by Introtek International are not subject to mandatory registration as defined in the REACH regulation. Based on our current state of knowledge, none of our products contain a concentration of more than 0.1 % by weight of any know substance of very high concern (Echa-list). We will continue to monitor feedback from our suppliers for any changes that occur.

REACH – Declaration of Conformity under the Chemicals Law.

We hereby confirm, based on our current state of knowledge, that all products supplied by us are delivered in compliance with all valid regulations under the Chemicals Law.

Sincerely,

---

Steve DiDio  
General Manager
